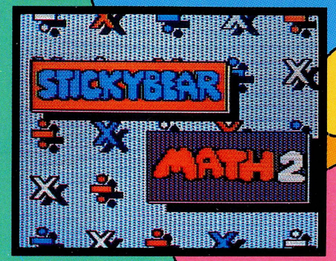
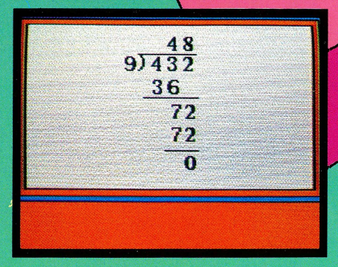
STICKYBEAR® MATH 2

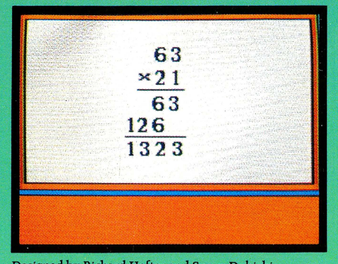
Kids have lots of fun practicing multiplication and division at their own skill levels!

Stickybear Math 2 does for multiplication and division what *Stickybear Math 1* did for addition and subtraction. The program helps children build skills while they are practicing. *Stickybear Math 2* can be customized and individualized for up to 40 students and keep their records.

The program has an automatic level-of-difficulty monitor that adjusts problems to student skills. This important feature enhances learning, minimizes frustration, and keeps the student challenged.







Multiplication and Division Program for ages 7 and up

Ask about other exciting games and educational programs *Weekly Reader Family Software* has for the whole family.
